Boynton Harbor Marina Redevelopment Project

The Boynton Harbor Marina is the eastern anchor to Boynton Beach's downtown district and continues to add to the overall success of the CRA's redevelopment efforts as well as being identified as the only South Palm Beach County Commercial Marina.

Completed in January 2017, the Marina Open Space project is the last of the redevelopment phases. This project has green space and seating areas for people to wait to board their fishing or dive charters or to simply relax and watch the boats.
